The **T.A.B. Bartosz Witczak** company has been existing on the market since 2003. It's staff
are highly experienced teams: designers, programmers, testers and
 DTP
specialists.

T.A.B. specializes in programming in the data management field.
In the course of the last 8 years, T.A.B. employees have worked in international teams and
contributed to the leading PIM and Dynamic Publishing systems.

T.A.B. has taken part in creating *mediando* (by designing, implementing, testing and
distributing).   In 2003-2009, T.A.B. designers and
programmers were co-authors   (the
only responsible for programming works)
of the
InBetween
software for Dynamic Publishing.

In the years 2013-2015 T.A.B. technologically supported the company Sputnik Software for
creating a government project: *Kalkulator Kosztów Zaniechania - KKZ* (Calculator of Cost
Social Negligence).

T.A.B. is an author of *SPRINT* , an advanced TimeSheet system. The system records and
manages working time, additionally, it plans and supervises tasks to be done.

For fans of team sports T.A.B. created an application *SportMan* that allows to collect, manage
and publish on the websites of all kinds of sports data in various forms: compilations, tables and
schedules.

In 2014., in collaboration with Marcin Ganowski - an outstanding Polish osteopath, TAB created
a system *osteo* designed to handle specialized service institutions.

T.A.B. is the author of an innovative platform *pulsstory* for managing active communities, and marketing automation.

Our current offer comprises:

- selling and implementing (*SPRINT*, *osteo*)
- analysing needs, designing and creating computer systems
- providing services in software quality
- providing DTP services

We are looking forward to doing business with you!
